SYSTEMS · NETWORKS · SUPPORT · AUTOMATION

José da Silva

Systems, networking and support technician, finishing ASIR. Also scripting and web when it helps.

Systems, networking and support technician. I administer Windows and Linux servers, resolve user incidents and automate repetitive work. I am currently finishing the ASIR diploma.

JS

OPEN TO
Available to join a team and contribute from day one

ROLES
Systems · Networks · Support · Automation

WORKING STYLE
On-site, hybrid or remote

LOCATION
Tordera (Barcelona)

EDUCATION
ASIR advanced diploma · year 2 (2025—2027)

LANGUAGES
Catalan and Spanish native · English B1 · Portuguese A2

01 Profile

Who I am, where I come from and what I want to do next.

I am from Tordera and I got into computing the usual way: taking old computers apart at home, breaking things and learning to make them work again. Then came SMX, where I discovered that what I enjoyed could also be a job.

At Tordera Town Council I learned that support is mostly about people: listening, understanding what someone needs and fixing it without making them feel foolish. At Hardysoft I moved on to administering Windows and Linux servers and automating tasks, and confirmed that this is the direction I want to take.

I see myself as an organised, curious person who adapts easily to new tools. When a problem appears I like to investigate before asking for help; when I solve it, I write it down. I am now finishing ASIR and want to keep growing in systems and networking alongside a team.

02 Experience

From hands-on support to server administration.

June 2026 — August 2026

IT Technician

Hardysoft Consultories · Palafolls

Support and administration for the consultancy's clients.

- Set up and administered Windows and Linux servers and network resources.
- Automated repetitive tasks with scripting.
- Worked on infrastructure projects and service deployments.
- Supported clients and guided users who needed more help.

Windows Server • Linux • Networking • Scripting

May 2024 — July 2024

IT Assistant

Tordera Town Council · Tordera

On-site support for the municipal departments.

- Technical support for users and resolution of day-to-day incidents.
- Maintenance, installation and configuration of computers, printers and servers.
- Inventory management and basic networking and security tasks.

User support • Hardware • Inventory • Networking

OTHER EXPERIENCE

2023 — present

Waiter · La Masia

Work alongside my studies.

- Customer service and order management.
- Stockroom organisation and service pace.
- Teamwork under pressure.

Customer service • Teamwork

---

03 Education

The technical foundation, step by step.

2025 — 2027

IN PROGRESS

Advanced Diploma in Networked Computer Systems Administration (ASIR)

IES Sa Palomera · Blanes

Second year: advanced Linux and Windows server administration, database servers and SQL, network management and scripting automation.

2023 — 2025

GRADUATED

Intermediate Diploma in Microcomputer Systems and Networks (SMX)

IES Lluís Companys · Tordera

IT infrastructures, troubleshooting technical incidents, and data connectivity and security in small and medium-sized companies.

2019 — 2023

GRADUATED

Compulsory Secondary Education (ESO)

IES Brianxa · Tordera

---

04 Skills

What I can do with my hands and what I can do with people.

SYSTEMS

Linux (Debian, Ubuntu) · Windows Server · Windows 10 and 11 · macOS · Virtualisation · Network services: DNS, DHCP, file sharing · Backups

NETWORKING AND SECURITY

TCP/IP · Local networks and structured cabling · Routers and switches · Firewalls and access policies · User and permission management

DATA

SQL · PostgreSQL · Data modelling · Information management and organisation

AUTOMATION AND TOOLS

Scripting (Bash, PowerShell) · GitHub · Microsoft 365 and Office · Inventory and remote support · Technical documentation

PERSONAL SKILLS

Resilience and stress management · Empathy and teamwork

Coordination and communication

Adaptability and fast learning | Attention to detail

Autonomy

05 Projects

What I have built during the course, explained through the problem and the solution.

Course project · 2026 — present

Digitalising a hospital

A simulation of modernising a hospital's systems, from the infrastructure to the internal management tools.

- Designed an infrastructure with high-availability systems.
- Modelled data and wrote SQL queries to manage the centre's information.
- Automated critical tasks and built tools for internal processes.
- Tagged and catalogued assets to make maintenance easier.

- High availability • SQL • Automation
- Documentation

VIEW THE REPOSITORY ↗

Course projects · 2024 — 2026

End-to-end IT infrastructure

Built and administered a complete lab infrastructure, from cabling to services.

- Physical network build: cabling, rack and equipment.
- Administered Windows and Linux servers and network services.
- Applied security policies and backups.

- Networking • Windows Server • Linux
- Security

06 Languages

Working in Catalan and Spanish, and getting by in English.
