Cover letter – IT

I am currently studying the Higher Degree in Networked Computer Systems Administration (ASIR). I am a practical, responsible person with a strong desire to contribute and expand my knowledge. I enjoy solving technical problems and leaving things working better than before.

I have experience in IT support, equipment maintenance, software and hardware installation, basic networking and systems administration. I really enjoy contact with people and making others' problems and difficulties my own, so that I can resolve every kind of incident in the most correct and timely way. I am very familiar with public administration terminology and document management.

I have also worked with office tools and I have knowledge of Python, databases and GitHub, and I have had some exposure to agile methods and Scrum.

I learn quickly, adapt easily and like to work in a clear and organised way. I like to contribute, help the team and feel that what I do is useful. I am looking for a job where I can collaborate from day one, keep improving as a professional and build a relationship of trust and good work with the company.

I am available for an interview or to provide any information you may need.

Thank you very much for your time.

Yours sincerely,
Jose da Silva
